PROFESSIONAL EXPERIENCE

GitHub

Oct 2024 – Present

Software Engineer

Remote

Copilot Usage Metrics

- Owned the design and rollout of a Copilot usage data export pipeline processing 100K+ requests/day, enabling enterprise admins to analyze 28 days of usage data at scale.
- Led accessibility remediation, resolving WCAG compliance gaps and unblocking enterprise customer adoption.
- Delivered core frontend components and backend controllers for the adoption/productivity metrics dashboard used by enterprise admins.

Enterprise Teams

- Drove enterprise team reviewer capabilities from discovery to delivery, decomposing scope into executable epics, leveraging AI and an expansive test set to identify gaps, and developing features now serving 825K+ users.
- Partnered across product, design, and engineering teams to drive cross-functional collaboration and accelerate delivery across multiple enterprise team reviewer batches.

Fine-Grained PATs

- Designed and developed UI optimizations and enhancements for GA.
- Major contributor to end-to-end testing across on-prem and cloud environments.

Computer Enterprises Inc

Feb 2022 – Oct 2024

Associate Developer, Developer 1

Pittsburgh, PA

- Delivered production features across Azure services as part of a cross-functional team.
- Built Azure OpenAI-powered internal solutions, supporting enterprise stakeholders.
